

River Stakeholder Event

31st May 2023

10am – 4pm

Halliwell Centre, Carmarthen

Join the Nutrient Management Board (NMB) Stakeholder Group and help to protect and enhance our rivers

Our Special Area of Conservation (SAC) rivers, the Cleddau, Teifi and Tywi, support some of West Wales's most precious biodiversity and are an important source of health and well-being for our communities.

Ceredigion, Pembrokeshire, and Carmarthenshire County Councils are collaborating to create Nutrient Management Boards to monitor the rivers and we need your help...

- **Is the health of our rivers important to you?**
- **Are you affected by, responsible for or interested in water quality in the region?**
- **Join us in working to protect and enhance our rivers.**

Refreshments and a light lunch will be provided.
To RVSP and for further information please contact: LECarrington@carmarthenshire.gov.uk

To ensure the Stakeholder Group reflects **all** the voices in our communities affected by and responsible for water quality in the region, we are inviting anyone with an interest to join us for our **first ever** Stakeholder Group meeting.

There will be presentations and workshops with attendees to identify the aspects that require further development to restore the health of the rivers.
